

The Prince Charles Hospital Foundation Research Equipment Grant Guidelines FY26 – Round 2

This document provides advice about the application process, eligibility and conditions to apply for a TPCF Foundation Equipment Grant. Further information can be obtained from Dr Rebekah Engel, Research and Impact Manager (research@tpchfoundation.org.au).

General information

1. Equipment Grants provide an opportunity for essential research equipment to be purchased.
2. Equipment is defined as a non-human resource and **includes** specialised IT equipment, software for specific implementation of research, or additional items for research and support e.g. specialist smaller equipment. The definition **excludes** consumables, personal laptops and general Queensland Health computers.
3. Applications must demonstrate how the equipment will contribute to research projects occurring at TPCF. Applications for equipment that will solely be used for clinical purposes will not be funded.
4. Items of equipment that will be used by multiple research groups will be considered favourably, as will applications for equipment that have confirmed co-funding (evidence must be provided).
5. Applications for the replacement of an existing piece of equipment must include justification for not repairing the equipment and the continued need for the equipment. Similarly, applications for duplicate equipment must include justification as to why it is required.
6. If successful, TPCF Foundation may fully or partially fund an equipment request. Partial funding may be provided to complement confirmed co-funding, or TPCF Foundation may work with the applicant to leverage external funding. In this instance, appropriate timings will be negotiated between the applicant and TPCF Foundation.

Eligibility

1. The equipment must be located at TPCF. The equipment must remain onsite unless prior written approval is granted for alternative arrangements.

2. Applicants are not required to be employed by Queensland Health or Metro North Health and Hospital Service. The focus is on supporting research that is taking place at TPCCH campus.

3. Applicants must obtain endorsement from their Business Manager and administering institute (e.g. TPCCH or University) **prior to submission**. This includes, but is not limited to, confirmation that the equipment is needed, that there is space to store the equipment, and that the administering institute will take responsibility for the purchase, maintenance and servicing of the equipment.

Application submission

1. Applications will only be accepted online through the Smarty Grants portal at <https://tpchfoundation.smartygrants.com.au/>.

2. Quotes must be obtained for all equipment to be purchased including Supplier name, ABN and GST shown separately. Please ensure the quote includes any freight, shipping and installation charges.

3. If the equipment quote is in a foreign currency, please convert to Australian dollars and include in the Additional Details section.

4. Signatures from the applicant and Head of Department must be included with the submission.

5. Upon signing and submitting their application, applicants:

- agree to adhere to all requirements for procurement through their nominated administering institution, including asset approval and registration.
- authorise The Prince Charles Hospital Foundation to make any enquiries it considers necessary in relation to the proposed research project.

Assessment (New to FY26 Rounds)

Equipment Grant applications will be assessed by a panel convened by TPCCHF. Prior to panel review, TPCCHF will check applications for eligibility, completeness, and alignment with Foundation priorities. Applications that do not meet these criteria will not proceed to assessment. Eligible applications will be evaluated based on the purpose of the equipment, demonstrated need, and the strength of the justification provided.

Successful applicants

1. In the first instance, TPCCH Foundation will provide **provisional approval** to successful applicants, after which additional requirements must be met:

- If procuring equipment through TPCCH, successful applicants are required to obtain full Asset Management Committee approval. The TPCCH Asset Management Committee Request for Equipment Form can be accessed [here](#), or requested via email (TPCH-ASSETS@health.qld.gov.au). The completed form should be returned to TPCCH Foundation, who will submit on behalf of the awardee.

- If procuring equipment through a university or other organisation, applicants must fulfil all institutional requirements and provide TPOCH Foundation with confirmation of approval to purchase the equipment.

2. Successful applicants will only be granted final approval and be able to access grant funds after all approvals are obtained, and a Grant Acceptance Document has been signed by all relevant parties.

Obligations of awardees

1. It is a condition of accepting the grant that recipients will acknowledge the support of TPOCH Foundation in any publication, media or presentation arising from the research and use of equipment.

2. The ability to engage with potential donors is critical to our success. It is a condition of accepting the grant that recipients will include TPOCH Foundation in any publicity surrounding the research, and may be called upon to participate in promotional activities.

FY26 Equipment Grant Key Dates – Round 2

Applications open	16 th February 2026
Applications close	10 th April 2026
Outcomes announced	June 2026
